- ♦ Water main installation and trolley track removal has been completed in the middle section of **Broad Street** and moved to the south side of the street for continued water main installation. Work will continue for the next two weeks at this location. The temporary east bound and west bound vehicle travel lanes continue to be defined by a series of toggles. Please observe caution when approaching and driving in the lanes.
- ♦ **For residents of King Street south of Broad Street**, this weekend the barricade in this work zone will be adjusted to allow access to residences by turning *right* off of Broad Street onto King Street. Thank you for your patience with this inconvenience. Crews are working quickly to complete this work and restore access to homes in the area.
- ♦ In the **block on King Street between Queen and Broad Streets**, please maintain only one lane of southbound traffic in this block. Vehicles may *turn right only* off of King Street and onto Broad Street. There is *NO left turn* at this time. Trucks are not allowed in this block and must turn off of King Street and detour onto Queen Street or pass over King Street if already on Queen Street. For safety's sake, carriages are prohibited from using this block to access Broad Street.
- ♦ Signalization work continues on corners of the **King/Queen Streets intersection**.
- ♦ **In the half block between 169-B King Street and Queen Street**, placement of the new gas line is 95% completed. Granite curb installation is proceeding northward in the block from Queen Street as well as concrete base pouring. Bluestone installation is now underway, and water lateral and electrical conduit work is on-going.
- ♦ The electrical conduit project is proceeding **on Jacobs Alley**. News flash! The King Street end will open *for the weekend only* for through traffic from Archdale Street.
- ♦ **Tailor's Walk** was closed this week to begin electrical ductbank work. *For the weekend only*, this driveway will also be open. Next week Tailor's Walk residents may see the driveway open at times; however, it will also close without notice. Please continue parking your vehicles in the City's Queen Street Garage at 93 Queen Street unless you are notified personally of a change in this directive. Thank you for your understanding of the situation.
- ♦ The electrical vault installation is completed **on Clifford Street** and the street re-opened. Crews will return to the area for electrical tie-in work later.
- ♦ The schedule to hardscape **Princess Alley to Fulton Lane** is maintaining a start date of March 5th.
- ♦ Hardscaping is now complete **in the half block between 204 King Street and Horlbeck Alley** with the exception of the radius curb at Horlbeck Alley and the area in front of 188 King Street. The bluestone sidewalk has been burnished, but a crew must return to this area to caulk and seal.

*Every worthwhile accomplishment, big or little, has its stages of drudgery and triumph;
a beginning, a struggle, and a victory.*
